

Path Finder Solutions conducted a conference on Governance of internet at Ramada Hotel Islamabad. There, we ascertained about the importance of internet in governance. Before this event, we were unaware of it. We met with one another and enhanced our friend circle due to this conference.

We learned how to get connected with the rest of the world through internet. We were also taught about the internet and institutions connected to it both nationally and internationally. Besides, we came to know how the fellowships of internet work; and how these fellowships are useful for a common man.

Moreover, the importance of internet in the lives of People with Disabilities (PWD), ease regarding using it and international laws were discussed. Issues and laws regarding accessibility of internet in Pakistan were also highlighted. We were taught about governance of internet, the importance of internet in the lives of PWD and qualities of leadership, so that we could make others aware of them.

After learning all the abovementioned things, we, with the collaboration of universities, shall organize seminars on governance of internet in our remote areas such as Jhang and Faisalabad because Faisalabad is also lagging behind in technology. Government College University Faisalabad is a huge platform for me to make PWD and other people aware of internet through seminars, for I am serving as an Assistant Professor in the department of IR and Political Science of this varsity.

I am much indebted to the organisers of this event, especially madam Gunela and Dr. Shabbir Awan

Regards

Dr. Anwar Ali
